

Environmental Policy Statement

The Policy of Powerstar is to encourage respect for the environment and the adoption of an environmentally responsible attitude in the fulfilment of business objectives.

The pursuit of this policy requires Powerstar to focus attention upon the following key principles:

Environmental Legislation – Powerstar complies with all relevant environmental legislation, regulations, codes of practice and other regulations to which it subscribes.

Management System – Powerstar has implemented a documented environmental management system. We have set environmental Objectives and targets and we monitor performance to enable continual improvement.

Communication – Powerstar promotes awareness amongst employees (and where applicable sub-contractors) of the importance of environmental issues to the business and the environmental impact of the business activities. This policy is available to the public and stakeholders on request.

Resources and Materials – Powerstar will conserve resources and materials, and manage their use efficiently, through implementation of waste minimization programmes and by encouraging the use of the waste hierarchy reduce, reuse, recycle and treatment where appropriate.

Operation of the Business – Powerstar operates the business efficiently with due consideration for environmental, social and economic impacts and values, and our relative competitive position.

To satisfy customer requirements we provide the design, production and installation of energy savings products.

A high value will be placed on the control and improvement of environmental performance and the prevention of pollution.

The environmental impact of significant changes to equipment or processes is assessed as part of the approval process.

Products – The production of products that Powerstar supply include consideration of environmental impact throughout the product lifecycle.
