

ENERGY EFFICIENCY FUNDING UP TO £5M STAY CASH POSITIVE FROM YEAR 1

POWERSTAR'S COMMITMENT TO CUSTOMERS

During the current climate the Powerstar team has been hard at work, both on-site and from home, to continue to provide an excellent service for new and existing customers.

The focus during this time is to protect the health and well-being of all involved, whilst continuing to uphold commitments to help customers reduce electricity costs, enhance energy efficiency, and minimise carbon emissions during a crucial period.

The whole team is passionate about helping customers achieve their energy targets, whilst protecting the business's operations and bottom line over both the short and long term.

Powerstar offers a full consultation service with no obligation to continue after initial assessment, and if a Powerstar solution will not benefit your business, the appointed sales representative will let the customer know so no time or money is wasted.

SUPPORTING UK BUSINESS DURING COVID-19

Throughout the COVID-19 pandemic, Powerstar has worked closely with its carefully selected funding partners to support customers with a special funding offer that matches the Government's Bounce Back Loan Scheme, approved for projects up to £5m with low interest.

This enables customers to implement award-winning solutions with no initial capital expenditure, providing 100% guaranteed annual consumption savings on electricity (available with Powerstar's patented voltage optimisation solutions), and, often, a guaranteed net-positive cash contribution in every year, including the first year of operation.

Following full repayment, the equipment is owned by the customer, with an estimated 50-year lifespan and typical payback period of 3-4 years. After the payback period, all savings provided by the system go directly to the customer, typically 6-10% annual savings on electricity costs.

HOW POWERSTAR OPERATES

No-obligation, transparent, and forthright consultative services

Full project design and implementation from conception to completion

Bespoke solutions designed to the specific requirements of each customer

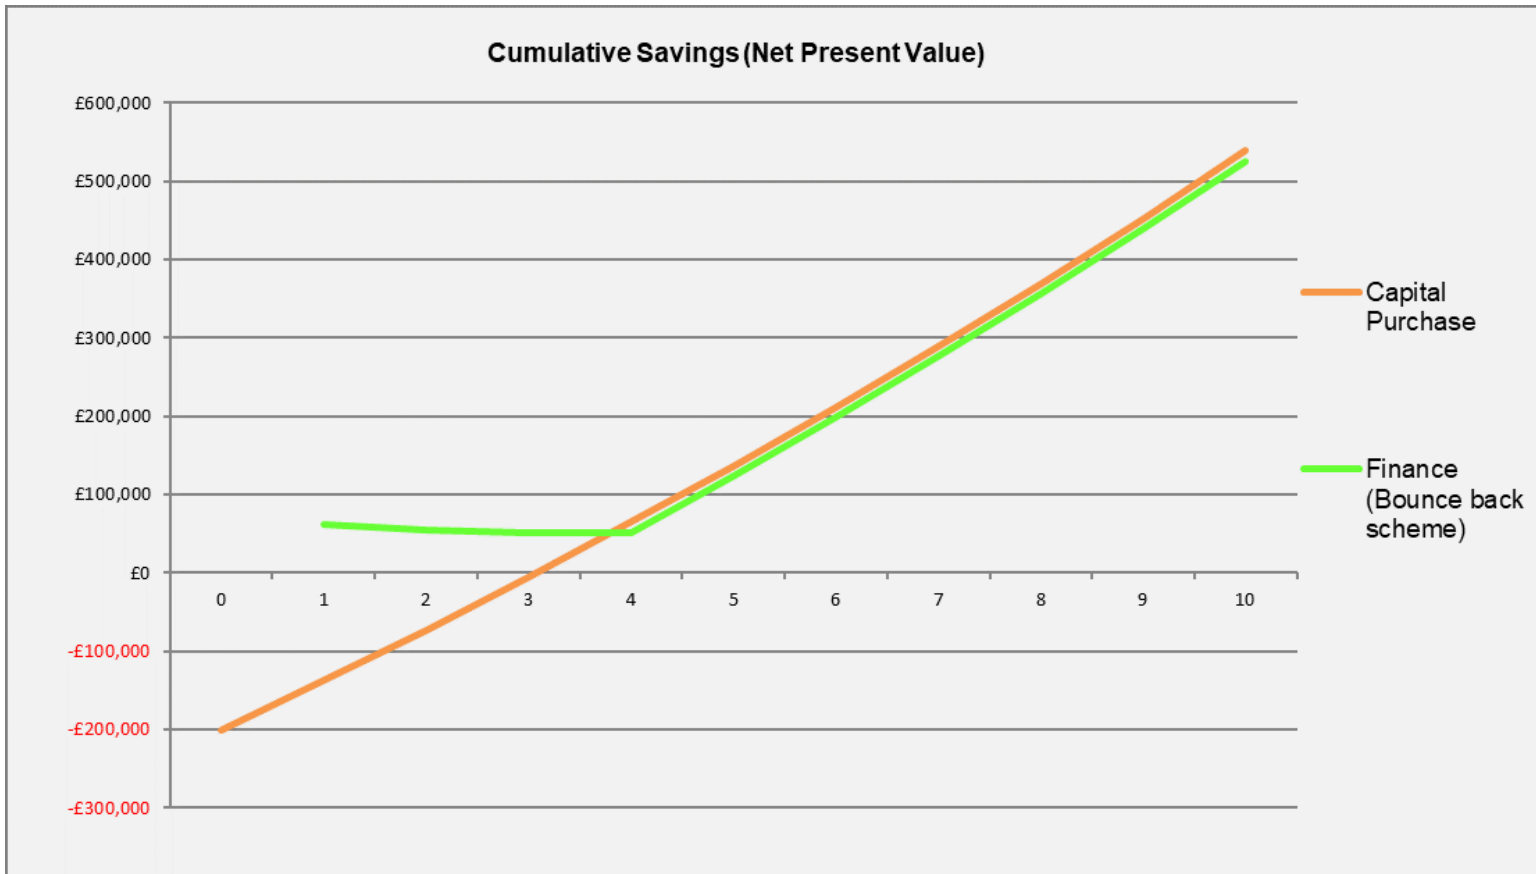

100% savings guarantee with transparent savings verification process

HOW THIS LOOKS IN PRACTICE: AN EXAMPLE BUSINESS CASE

Below is an example graph to show the predicted cumulative savings during the first 10 years, based on a 3-year payback period at 7% annual savings on a £952,000 annual electricity spend. Both capital purchase and finance options are represented.

CONTACT POWERSTAR TO FIND OUT MORE

If you're interested in learning more about this low interest funding option and how Powerstar could help your business reduce electricity costs and carbon emissions, contact Powerstar to discuss your requirements with an expert member of the Powerstar team.
