

Voltage Optimisation in Theatres

With inflated energy costs and an ever growing focus on sustainability, theatre managers are under pressure to ensure energy costs and carbon emissions are reduced without impacting on audience experience, comfort and enjoyment.

Powerstar voltage optimisation systems represent an ideal technology to help with these problems:

- Reduces electricity costs and carbon emissions
- Supported by a 100% saving guarantee
- Manufactured in the UK to highest standards
- Fully supported turnkey solution with seamless project management & installation
- Comprehensive after sales service & support
- Finance & leasing packages available so systems can be installed with no up-front cost
- Proven and established in theatres...

THE PLACE THEATRE ENERGY SAVINGS

The Place Theatre, Telford is amongst a number of theatres in the UK that have installed Powerstar.

The Place Theatre is a 613 seat theatre with a bar, cafe, dressing rooms and meeting spaces for hire

- **Energy consumption savings: 9.3%**
- **kWh savings: 25,139**
